(d) Major steps taken to augment indigenous availability of coking coal, inter alia, include:—

(i) Increasing raw coking coal availability by reorganising existing mines and development of new mines.

(ii) Modification of the existing coking coal washeries to improve the capacity utilisation as well as the quality of washed coking coal.

(iii) Increasing raw coal feed to washeries by supplying low volatile medium coking coals of suitable quality.

(iv) Early commissioning of two new washers under construction at Madhuband (Bharat Coking Coal Limited) and Kedla (Central Coalfields Limited) for increasing washing capacity.

(v) Effective and better coordination between Coal India Limited and the steel plants is being done through regular review meetings at various levels.

To some extent, however, the effect of the increase in input cost can be offset by increasing productivity. Coal industry are continuing to take steps to increase productivity and are focussing on better capacity utilisation of heavy earth moving machinery and increase in output per manshift.
